Carolyn, Wayne, and Steve

As a follow up to an action item generated as a result of questions related to SEE process equipment spill containment that arose in our monthly BCT conference call, please find attached the following information.

The ST012 SEE OM&M manual associated with the operation of the SEE system was provided in the SEE construction completion report which was issued on January 23, 2015. The Spill Prevention Control and Countermeasures Plan (SPCC) was provided on the SharePoint in the regulatory folder on January 30, 2015. Please find attached portions of both reports.

Attached are the Emergency Response Matrix found in the SEE OM&M report, an updated Table 4-1 from the SPCC report (titled Containment Summary) which includes petroleum related equipment (as required in the SPCC) and non petroleum related process equipment (not required in the SPCC), and Figure E-1 from the SPCC report depicting the equipment layout on site.

The above information and any other questions can be further discussed at the BCT meeting on March 25, 2015.
